A sustainable entertainment district that balances the site and flow of social and environmental activity. Equilibrium is a project that develops "The Banks." The Riverfront District, Ohio, into a high-density, mixed-use, sustainable entertainment district that promotes healthy living. Equilibrium balances people and the environment through smart programming that supports flexible spaces, engaging programs, and dynamic streetscapes to create an iconic place. By forming this unique district, it will address current issues with the site, while integrating a revaluation for long-term plans, including the 2018 Green Cincinnati Plan. Balancing the environment and development creates a model for sustainable neighborhoods by absorbing, shaping, and balancing the area. Forming this unique district will address current issues with the site, while integrating a revaluation for long-term plans, including the 2018 Green Cincinnati Plan. Balancing the environment and development creates a model for sustainable neighborhoods by absorbing, shaping, and balancing the site. Equilibrium accomplishes this through The Hop, the pedestrian mall, and the expansion of riverfront greenway.

Equilibrium is a project that develops "The Banks," an entertainment district that balances the ebb and flow of social and educational area. Forming this unique district will address current issues with the site, while integrating a revaluation for long-term plans, including PLAN Cincinnati and the 2018 Green Cincinnati Plan. Balancing the environment and development creates a model for sustainable neighborhoods by absorbing, shaping, and balancing the site. Equilibrium accomplishes this through The Hop, the pedestrian mall, and the expansion of riverfront greenway.
